Instruction to run the project 6 code

Prepared by Mili Biswas

Step1:

Put all the files uploaded in illias in a single directory or folder (say "**project_folder**")

Step2:

Run the below command

python project6.py

Alternatively, you can run the jupyter notebook

SMA_Project6_FinalReport.ipynb

For more details, all codes and artefacts also uploaded in github:

https://github.com/milibiswas/network_community_detection
